BLANKET COLLECTION

JAMES & NICHOLSON

1 JN 900 James & Nicholson | 02.0900

Fleece Blanket with Cover
260g/m², 100% polyester
Easy-care, thermal insulation, size: folded as a cushion approx. 40x40cm, enfolded 130x180cm
onesize
🛒 20 📦 1

2 JN 950 James & Nicholson | 02.0950

Fleece Blanket
240g/m², 100% polyester, antipilling fleece
Multifunctional fleece blanket, size: 130x170cm, supplied as decorative gift pack with satin ribbon
onesize
🛒 20 📦 1

3 JN 957 James & Nicholson | 02.0957

Fleece Blanket with Fringes
220g/m², 100% polyester, antipilling fleece
For leisure and gastronomy, wide short fringes, easy-care, size: 120x150cm
onesize
🛒 32 📦 1

4 JN 1906 James & Nicholson | 02.1906

XL Picnic Blanket with shoulder strap
160g/m², outer fabric 1: 100% polyester, outer fabric 2: 100% polyethylene, lining: 100% polyurethane
Adjustable handle, circumferential piping, soft fleece surface, water- and dirt-repellent underside, size: 180x180cm
onesize
🛒 12 📦 1

5 JN 1901 James & Nicholson | 02.1901

Fleece Blanket
200g/m², 100% polyester, antipilling fleece
Merrowed borders, size: 130x170cm, decorative gift pack with banderole
onesize
🛒 24 📦 24

6 JN 953 James & Nicholson | 02.0953

Picnic Fleece Blanket
160g/m², 100% polyester
Portable soft fleece picnic blanket, waterproof underside with PVC coating, fastens into a neat package with carry handle, size: 130x150cm
onesize

Textile Encyclopaedia – fabrics and materials from A-Z

3-in-1 jackets

jacket consisting of two components that can either be worn individually or together, e.g. removable fleece, jackets offers the opportunity to wear fleece and jacket individually or together (3 possibilities to wear).

acrylic

synthetic fibre similar to wool, characteristics: light-resistant, easy care, warming, high bulkiness, weather- and shape resistance, quick drying

antipilling

special treatment to reduce pilling and felting

antibacterial

special treatment to avoid the proliferation of bacteria and fungus, reduces odour

Bionic-Finish® Eco

water and dirt repellent impregnation, also known as DWR (durable water repellent) treatment, made from biodegradable ingredients, environmentally friendly and PFC-free, characteristics: washable, abrasion-resistant

brushed cotton

loose fibres are erected through a brushing process, enables a soft and velvet surface

brushed inside

sweaters are roughened inside after knitting to obtain the soft and warming fleece lining

button-down collar

collar points are fixed with buttons, sporty look, mostly used for leisure wear worn without a tie

cap closures

metal clip closure, hook and loop fastener (Velcro®, Rip-Strip™), buckle (tri-glide buckle), press stud (click&snap closure, snap back, pvc closure), Flexfit®

chino cotton (cotton-twill)

twill weave fabric, pattern of diagonal parallel ribs

collar bones

are added to the collar to prevent the collar points from rolling up, collar bones can be fixed or removable and can be made of different materials (plastic is the most commonly used material)

combed cotton

the cotton is parallelized before spinning and short fibres are removed, as a result, the spun yarn is finer, stronger and has a smoother surface, less pilling

Cordura®

trademark, fabric made from polyamide, characteristics: rougher, better tear-resistant and more textured than regular nylon, water repellent and fast drying

cotton

natural fibre, high moisture absorption, pleasant touch, good colourability

cutaway collar

also called Italian collar, widely-spaced collar points, depending on the distance between the collar wings it is suitable for smaller or larger tie knots

decorative seams

are often conspicuous and are intended to decorate the garment in a targeted manner, some examples are piping, lap, quilting or edge seams, certain areas are contoured or made more conspicuous through decorative stitching, decorative stitching can only decorate or have an additional function, decorative seams can be distinguished by stitch type, stitch length and thread color

down jackets

have to be filled with down from duck or goose, characteristics: light weight, breathable, high isolation, great elasticity (unfold quickly to their original size after unpacking), winter jackets consist often of a mixture of 90% down and 10% feathers, feathers are important for an optimal isolation and enable the right unfolding of the jackets that wouldn't be possible with a filling made of 100% down

drill

fabric in body weave, often in combination with cotton (cotton drill) or linen, characteristics: tear-resistant, extremely dense, hard-wearing, long-lasting

DuPont™ Sorona®

Sorona® is a functional fiber made from renewable vegetable resources by the chemical company DuPont™, greenhouse gas emissions and energy consumption are significantly lower in production than with conventional products, characteristics: soft, robust, breathable and quick-drying fabric with good thermal performance

elastane

synthetic fibre used in small quantities for a better elasticity and form stability, often used in cuffs (e.g. on the neckline and sleeves)

enzyme washed

fabrics are treated with enzymes for various reasons, often aiming for a soft feel and a smooth surface, sometimes small tears are deliberately created in the fabric to make clothing look worn (used look)

felt

non-woven fabric, fibres get connected through a chemical, thermic or mechanical process, originally made from wool, also produced in various natural and synthetic fibres, characteristics: high density, elastic with pressure, slightly stretchable, resistant, high isolation

fil-à-fil

fabric with a diamond-like appearance, colour change in warp or weft ensures a special two-tone look, which is referred to as the speckle effect, characteristics: hard-wearing and easy to iron

fleece

brushed velour fabric, usually made of polyester, the loops of this knitwear are cut open and roughened, soft and velvet touch, comfortable on the skin, high isolation at low weight, water repellent

fleece with smooth surface

perfect for decoration because of the smooth outside, brushed only inside

french terry

not brushed inside, sweater is less soft and warm, less pilling

heather/melange

using yarns with different colours and materials creates this effect

herringbone

twill fabric, distinctive V-shaped weaving pattern, reminding of a fish skeleton, easy to iron, tough and densely woven fabric, often used for casual business outfits

hybrid jackets

made of mixed material, that provide different characteristics, for example on body and arms, for example wind proof and breathable materials are combined

interlock

very compact surface, high quality, durable, elastic fabric with good washing results, inside and outside look the same

jute

bast fibre, made from the stems of jute plant, coarse fibre, characteristics: tear resistant, suitable for dyeing, high firmness at stretching, specific smell

kent collar

elegant, classical, pointed, short collar - suitable for almost all tie knots and -shapes, also suitable for bow ties

knitted fleece

knitted out- and brushed inside give the fleece an exceptional visual characteristic and a good isolation

Lycra®

registered trademark, elastane fibre

mercerized cotton

Mercerization is a refinement process to make fibers more tear-resistant and give them a shiny look, mercerized cotton can be colored more evenly, shrinks less, hardly creases and has a particularly soft touch

mesh

material with coarse structure for more breathability, often used for linings or insets

microfleece

short cut fleece material, lighter, finer and more compact than regular fleece

mottled yarn

using yarns with different thickness creates this effect

neck tape

fabric tape between body and collar for comfortable wearing, shoulder-to-shoulder necktape is a characteristic of quality and improves dimensional stability and stabilisation of the seams, often with herringbone pattern

new kent collar

an elegant mix of kent and cutaway collar, not as wide as the cutaway, not as pointed as the classical kent collar, suitable for all tie knots

organic cotton

has certifications such as GOTS and OCS, in-conversion cotton supports farmers in switching from conventional to organic cotton, during the conversion all ecological standards are already observed, it usually takes 3 years to receive an organic certification

oxford

plain-weave fabric, two-tone appearance because of the use of one white and one coloured yarn, durable and soft fabric that is warming on cool days, mostly used for leisure wear and often in combination with a button-down collar

padded jackets

quilted parts guarantee an even filling, filling can exist of various materials, padded jackets with down filling are called down jackets

panels

fabric elements of caps are called panels, most caps consist of 5 or 6 panels, 5 panel caps are better suitable for decoration on the front (no stitching at the front)

pima cotton

high quality due to long fibres, harvesting by hand and optimal growing conditions in Peru, characteristics: extra soft, light shine, extremely durable

piqué

granular surface, raised parallel cords or geometric designs in the fabric are characteristic

polyamide (nylon)

synthetic fibre with high durability, quick drying

polycotton

mix of cotton and polyester, to use benefits of both materials

polyester

most common synthetic fibre, characteristics: tensile strength, fineness, good dimensional stability, low moisture absorption, good wash behaviour, excellent light resistance

polyester pongee

fabric made from polyester filaments, thin, sleek fabric, formerly made from silk

poplin

plain-weave fabric, breathable, durable, smooth, lightweight and densely woven material, one of the most common fabrics for shirts and blouses

preshrunk

procedure to reduce shrinkage after washing (permitted tolerances)

raglan sleeves

diagonale seams course starting from the collar

recycled cotton

old textiles or textile remnants are shredded and spun into new fibres

recycled polyester (= rPET)

Plastic bottles and other plastic waste are shredded and melted down in order to produce new polyester fibers from them, recycling greatly reduces water consumption, CO2 emissions and waste, but the use of different plastic products leads to difficulties in the dyeing process and rPET often requires repeated dyeing processes, in addition the material is not biodegradable and releases microplastics into the environment, for these reasons experts disagree about the sustainability of the material, general characteristics like conventional polyester

rib knit

right/right product, equal in- and outside, often used for collar and cuffs, high elasticity, low material weight, difference between 1x1 rib (alternately knitted left and right) and 2x2 rib (alternately 2 left and 2 right stitches)

ring-spun cotton

softer, finer, smoother and more shiny than open end yarn, optimal printability

rip stop

typical chequered structure due to a special weaving technique, mostly made of nylon, characteristics: particular tear-resistant and strong

semi combed cotton

instead of 3 combing processings there is only one, result is a semi-finished product between carded (not combed) and combed cotton

set-in sleeves

straight set sleeves

single jersey

fine knitted, stretchy, breathable material, inside and outside different (left/right loops), material of most t-shirts

single ply terry

made of fine single yarns, fine loops get twisted and connected, softer and more absorbent fabric, more resistant against pulling out threads

softshell jackets

functional jackets, usually made of 2 or 3 layers (with membrane), inside material (e.g. microfleece) provides isolation and transports the moisture away from skin, if existing, the membrane has windproof and breathable function, outside is made of water repellent material, that transports moisture to the outside, softshell jackets without membrane are more breathable, jackets with membrane are more wind and rain proof

stretch

marks stretchable fabrics including a share of certain materials like for example elastane or Lycra®

Teflon®

used for coatings, water and dirt repellent, not printable

terry cloth

cotton fabric typically used for towels, small loops on one or both sides, very soft, bulky and absorbent material

(T)PU coating

through an inside coating the material gets breathable and water repellent or even waterproof

tubular construction

if not specified differently, all models have side seams to adapt the fit, items without side seams are declared as tubular construction

twill

twill weave fabric, pattern of diagonal parallel ribs, most common use in denim fabrics, durable fabric with a warm and soft touch

viscose (rayon)

chemical fibre made from a natural basic material (cellulose), often referred to as artificial silk, eudermic, not stretchable, strong wrinkling, flowing fabric, very even surface, perfect for dyeing and printing

windproof

keeps the wind completely out, windproof products are not always waterproof, but waterproof articles are always windproof, materials that allow a maximum of 5 liters of air per second through one square meter of fabric are called windproof, windproof materials are often uncomfortable to wear due to the lack of breathability during activity

available for men, women and children, unisex

organic cotton

heavy, T-Shirts from 180g/m², Polos from 200g/m², Sweats and Fleece from 300g/m²

60°/90°/95° washable

neutral size label (no brand label) in neckline

article made of combed cotton

Polo with smooth surface

Sweats, not roughened inside

stretch fabric, e.g. with elastane

Poplin cotton - light smooth material

sustainable product

recycled polyester

Poplin mix - light smooth material, low shrinkage

Twill - diagonal yarn

oxford - plain-weave fabric, two-tone appearance

membrane

winter product

zip for decoration

waterproof, sealed seams

Tear Away Label
